

CROSS-BORDER PAPERLESS TRADE: GAINDE 2000 and e.trustexport are launching a joint project for the secure and structured provision of documents from abroad in ORBUS, the Single Window of Senegal.

Dakar – Paris – 21st March 2023 – On the occasion of the SITL 2023 exhibition, **GAINDE 2000 Operator of the Single Window of Senegal** and the **French start-up e.trustexport** announced today the launch of a joint project, aimed at making available in a secure and structured way the bundle of documents in ORBUS, the Single Window for Foreign Trade in Senegal.

This project for the exchange of international commercial documents was undertaken with a view to securing the chain of transmission of required documents, by making their sources more reliable.

This project will also strengthen the ORBUS Single Window with attached documents that will be integrated from the e-trustexport trust platform, guaranteeing the authenticity of the documents from the source.

About GAINDE 2000:

GAINDE 2000, operator of Senegal's Single Window for Foreign Trade and leader in Dematerialization in Senegal, is extending its services to users of foreign trade, with the integration of international trade documents as part of the strengthening of the use of certified electronic documents.

Created in 2002, GAINDE 2000 specializes in the facilitation of international trade, the modernization and dematerialization of administrative formalities.

So to continue its innovations, GAINDE 2000 collaborates with the start-up e.trustexport to securely exchange documents between trading partners (exporters, importers, suppliers, etc.).

As a reminder, GAINDE 2000 was rewarded in 2012 at the United Nations with the UNPSA Prize for the improvement of public services.

About e.trustexport :

e.trustexport is a secure platform of trust that facilitates and accelerates pre-clearance operations, thus improving delivery times and costs for shipments. Its cross-border document hub interconnects stakeholders and concentrates on a single private cloud all the documents necessary for export and import files.

Thanks to more than 200 functionalities, the e.trustexport workflow makes it possible to process, automate and exchange essential information directly between customers and suppliers, in real time and in complete cybersecurity.

e.trustexport is a private French company.
